## Cameron Coy's

The image shows two Instagram posts from the account **IU Luddy School**.

**Post 1:** A photo of Clarence "Skip" Ellis, a Black man with a beard, wearing a yellow and orange patterned shirt, standing in front of a whiteboard. The caption reads: "Clarence "Skip" Ellis was the first African American to receive a Ph.D. in Computer Science. From a young age he was fascinated in computing, and went on to become a renowned computer scientist. Regardless of what people say, he believed that everyone can and should push themselves to be what they want to be – "People put together an image of what I was supposed to be...So I always tell my students to push." #diversityandinclusion #diversityincomputing". The post has 75 likes.

**Post 2:** A photo of the same man, Skip Ellis, in the same setting. The caption is identical: "Clarence "Skip" Ellis was the first African American to receive a Ph.D. in Computer Science. From a young age he was fascinated in computing, and went on to become a renowned computer scientist. Regardless of what people say, he believed that everyone can and should push themselves to be what they want to be – "People put together an image of what I was supposed to be...So I always tell my students to push." #diversityandinclusion #diversityincomputing". This post has 56 likes.

## Jumanah Amoudi's

The image shows three Twitter posts from the account **Women in Tech** (@WomeninTech).

**Post 1:** A photo of Radia Perlman, a woman with long grey hair, smiling. The caption reads: "Today, I want to shed light to a women known as "Mother of The Internet", @RadiaPerlman. Radia was able to creat a system that solved an issue made us able today to use the internt. more in the thred #Women&Tech". The post has 75 likes.

**Post 2:** A photo of Radia Perlman, smiling. The caption reads: "Luddy school student! Do you know @RadiaPerlman? Known as the "Mother of the Internet". She is the innovator of the Spanning Tree Protocol that has solved an issue, allowing us to use the Internet today! Thank you, Radia!! #Women&Tech #RadiaPerlman #SpanningTreeProtocol".

**Post 3:** A photo of Radia Perlman, smiling. The caption reads: "Campus Party™". The post has 10,328 views.

## Women in Tech

Have you ever heard of the "Mother of the Internet" @RadiaPerlman? An engineer and a mathematician, she had her bachelor's and master's degree from MIT. Her innovation is the reason we are able today to use the internet. She was one of few women working on what we know now as the internet back in the 70s! She was a true legend who wasn't scared to show her talent in a male-dominated field at the time.

...

Lucky school students! Pause for a minute to read about @RadiaPerlman. The "Mother of the Internet". She showed her strength and succeeded in a field that is seen only for men. Radia's ideas were seen as easy and not worthy because she simplified them very well to be understood by the public. Her other male colleagues' ideas had been applauded for by her bosses because no one could understand what they were trying to say. However, right now, I want to applaud Radia for standing up and fighting back to help the world be a better place and helping us today to use the internet.

## Rioof Albedair's

Hey there! I'm super thrilled to share my post featuring #RedietAbebe, an incredible trailblazer in computer science. She's the first black woman to earn her Ph.D. in computer science at Cornell University and the second in the history of the College of Engineering. Abebe's work in algorithms and artificial intelligence is truly inspiring. What sets her apart is how she merged her math degrees with her passion for addressing inequality and making a positive social impact.

With this post, I aim to celebrate her achievements and raise awareness about her incredible contributions! 🌟💻#EmbraceDiversityInTech #TechInclusionMatters

Hi, I'm so excited to share about #RedietAbebe in my post! She's a trailblazer, being the first black woman to earn her Ph.D. in computer science at Cornell University. Her work in algorithms and artificial intelligence is truly remarkable. What's even more inspiring is how she's using her math degrees to address inequality and make a positive social impact.

through this tweet, I'm intending to celebrate her achievements and spread awareness about her contributions! 🌟💻#CelebrateDiverseMinds #InclusiveSTEMCommunity

Rioof Hi, I chose the Ethiopian #RedietAbebe to be the subject of my post because she's the first black woman to earn her Ph.D. in computer science at Cornell University's history, and the second in the history of the College of Engineering, and she's specifically working in algorithms and artificial intelligence. Moreover, what makes her an even greater character is that Abebe blazed a trail in computing not only for herself but for all black women by merging her math degrees with her interest in inequality, and social impact.

#DiversityInSTEM

The goal of this post is to educate people about Rediet Abebe's great contribution to computing and the impact she made in reducing gender bias and racism in the STEM field.
